Notice of References Cited (PTO-892)	, 	ummary (PTO-413)			
2) Notice of Draftsperson's Patent Drawing Review (PTO-948) B) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date)/Mail Date formal Patent Application (PTO-152)			

Application/Control Number: 09/889,130

Art Unit: 1616

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Cardo Kelli is dropped.

Foreign references are not understood by examiner, but JP patent office found them relevant-please translate.

Claims 1, 3, 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fukuvi-JP 9-169916 in view of Mawatari et al 5614568).

As shown in the JP PCT translation, Fukuvi provides pesticidal resins, polyamide, with carboxylates-esters, pesticide and fibrous inorganic filler. As to the fibrous filler, Mawatari shows size of fibers to utilize with polymers of Fukuvi types, to provided pesticidal resins (see col.14, lines 14-24, and summary of Mawatari.

Fukuvi disclose the instant active agent & polymers in various formulation,

However, not all ingredients and quantification is spelled out. It would be obvious for
one in the art to provide appropriate size, and adjuvants, to provide economical, non
infective products, given the teachings of Mawatari in the same art as Fukuvi.

All the critical elements of the instant are disclosed. The amounts and proportions of each ingredient are result effective parameters chosen to obtain the desired effects. It would be obvious to vary the form of each ingredient to optimize the effect desired, depending upon the particular article of interest, reduction of toxicity, cost minimization, enhanced, and prolonged, or synergistic effects.

Applicant has not provided any objective evidence of criticality, nonobvious or unexpected results that the administration of the particular ingredients' or

Application/Control Number: 09/889,130

Art Unit: 1616

concentrations provides any greater or different level of prior art expectation as claimed, and the use of ingredient for the functionality for which they are known to be used is not basis for patentability.

The instant invention provides well known old art recognized compounds, with well known art recognized effects, applied by well known art recognized methods to achieve same products.

Claims 1, 3, 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Mawatari et al 5614568.

Claim 1 is too A) polyamide

- B) carboxylic acidamic
- C) pesticide
- D) fibrous inorganic

<u>Mawatari</u> has polyamide (E, col.1) and antibacterial agent (B, col.1) with, carboxylic acid amide (col.9, lines 50-59). Fibrous inorganics are potassium titanote, glass and carbon at 5-150 parts/100 parts composition (col.14, lines 14-24) of 6-60 micron diameter and > 30 micron length.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Neil Levy whose telephone number is 571-272-0619. The examiner can normally be reached on T-F from 7:00a.m to 5:30p.m.

Art Unit: 1616

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page, can be reached on 571-272-0602. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
